Karnataka
(India)

Corona virus disease (COVID-19) is an infectious disease caused by newly discovered corona virus. Most people infected with the COVID-19 virus will experience mild to moderate respiratory illness and recover without requiring special treatment. Wrong information, myths and talk regarding Covid-19 are spreading faster than the virus itself. Most information spreading on social media is from unauthenticated sources and is spread by persons either with little knowledge on the matter or with some sinister design. It is, therefore, important to debunk these myths and wrong information.

About the Author

Dr. Shivakunmar G S., is presently working as an Assistant Professor of Education, at Kumadvathi College of Education, Shikaripura, Karnataka, completed his M.Sc.,(Zoology) from Karntak University,Dharwar and M.Ed., from Kuvempu University in 2000 with Second Rank and one cash prize for the University rank.
